

# THE GLEICHEN CALL

VOLUME XXVIII NO. 9 10

GLEICHEN, ALBERTA, WEDNESDAY MAY 22, 1935

SUBSCRIPTION \$2.00 PER YEAR

## FARM WOMEN HOLD MOTHER'S DAY PROGRAM

The Mother's Day meeting and program held every year by the U. F. W. A. of Gleichen is becoming one of the feature events of the year's work and this year was no exception.

Last Thursday a large number of ladies met at the home of Mrs. J. C. (Grandma) Hutchison, to conduct their regular meeting and commemorate Mother's Day. Vice-President Mrs. E. Burne acted as chairman. Roll call was answered by a verse to mother. Regular business and correspondence was disposed of as quickly as possible and the meeting adjourned to turn the rest of the time over to the program.

Mrs. A. Quinnell acted as chairman of the program committee assisted by Mrs. W. H. McKeever. To begin with everyone was presented with a lovely pink carnation. Mrs. R. J. Burne and Miss Goodie gave a delightful piano duet; Mrs. J. A. McArthur, Mrs. H. Burne and Miss C. Burne sang two beautiful tunes; Mrs. F. Day and Mrs. E. Ethridge played two mandolin selections and Mrs. Buckley sang a solo. An appropriate Mother's Day message was read, the prize given to group No. 1. A delicious lunch brought the very pleasant afternoon to a close.

## A BOOST FOR SOCIAL CREDIT

(By A Local Booster)  
It has been stated on the authority of the National Educational Association that if there were only 100 men in the United States and only \$100.00 for distribution amongst them, on the present basis of distribution of wealth in that country; one man would get \$59.00; one man would get \$9.00; 22 men would each get \$1.23; 76 men would each get less than .07.

The same authority claims that these figures also hold true when applied to Canada and if so, is it any wonder that the people of Alberta think that a system might be adopted that would assure a more equitable distribution of wealth in this province. What do you think?

## BOARD OF TRADE HEARS ADDRESS BY I. F. FITCH

I. F. Fitch of Calgary addressed an audience in the Gleichen Community Hall under the auspices of the Board of Trade. While a good number of citizens and members were present, the best showing in attendance was made by the Boy Scouts and Girl Guides, who turned out in full number to greet in Mr. Fitch, a man who is actively engaged in the work of scouting and who at the present time occupies the position of chairman of the Calgary District Association. The subject of Mr. Fitch's address was "These Twenty Five Years," referring to the years elapsed since King George V took over the British throne.

Some of the most important points touched during the lecture were the events during that period of time. The turning down of reciprocity was considered of far reaching consequences. Then of course the Great War with its results in losses and debt burdens; also the result of the intense increase in production the formation of the League of Nations.

The developments of the internal combustion engine and the general use of the motor car were pointed out. Then followed a discussion of the coming hydro-electric power and its results, mass production, the exhaustion of free lands, the advent of the airplane and the radio which were all events taken from that particular period of twenty-five years.

In conclusion Mr. Fitch also spoke of the great changes that have taken place in the minds of the people, in the minds of the various governments and particularly the attitude of the state towards its responsibility in providing for the poor and the recognition that provisions must be made for those in need. Mr. W. Stormeier occupied the chair, while Mr. John Boyd, a personal friend of Mr. Fitch introduced the speaker. Mr. James Black tendered a hearty vote of thanks to Mr. Fitch on behalf of the Board of Trade.

## PARADE AND FINE SPORTS PROGRAM FOR EMPIRE DAY

Next Friday, May 24th, Empire Day the postponed Jubilee parade and children's sports as well as the hockey dance will take place. There will be no admission charge to the fair grounds, therefore there should be a record attendance.

For many years past the Gleichen and District Agricultural Association have taken charge of Empire day sports, and it has been recognized as Gleichen's big day of celebration, the chief feature being the baseball tournament. This year, however, Gleichen has no organized baseball team. The Association has therefore decided to accommodate the Jubilee committee and let them run their program of sports they had prepared for May 6th. The parade will line up at the auto camp at one o'clock and at 1:30 will start for the fair grounds. Arriving at the fair grounds, some 400 children in grades 1 to 8 will be presented with medals, after which the various sports outlined for May 6th will be carried out. There will be a good variety of events and a fine array of prizes will be given away. All children of Scout and Girl Guide age may participate. After the sports all out of town children will be treated to a feed of buns, weiners and a drink of something.

The Agricultural Association are planning to hold a meeting in the afternoon when the prizes for the 1934 Field Crop Competition will be awarded and arrangements made, if possible, for a competition for 1935.

In the evening the big dance sponsored by the Gleichen Hockey Club will wind up the day. This dance will take place in the Community Hall and all are invited to attend.

## CROP REPORT OF ALBERTA

(Issued by the Department of Agriculture, Edmonton.)

Following one of the most backward seasons in Alberta's history, seeding of wheat is now general over the province, fully three weeks later than in 1934. In the extreme southern and south-western sections of the province, wheat seeding is from 25 to 50 per cent completed, while in the east-central and south-central districts the wheat is practically all in. Throughout the north-central districts seeding has just become general and the percentage in the ground is at this date comparatively small. Cold weather, with frequent falls of heavy wet snow, and rain, interspersed with periods of high winds, characterized April and the first half of May, and it was not until the present week that seasonable spring weather arrived. Intermittent showers of rain are still interfering somewhat with farm operations.

Surface moisture conditions may fairly be stated to be the most satisfactory for some years, although reserve moisture in most of the province is not any too plentiful. Continuous precipitation during the spring months has, while delaying operations, created an optimistic feeling.

Held back by late spring conditions hopper hatching is not expected to commence for another two weeks. The extent of this menace depends entirely upon future weather conditions. Sudden warm weather would tend to bring out the hoppers in large numbers very quickly in the heavily infested areas, and farmers in these areas are urged to be prepared to deal with the situation. Generally speaking, the hopper menace is not expected to be as great as in the past three years.

The general tendency this year is to reduce wheat acreage and increase the acreage in grain crops. In one or two districts, it is reported that the decrease of wheat acreage will be comparatively heavy, but the general decrease over the province is not expected to be great, although it is too early to make a definite estimate.

Considerable seed grain and feed relief has been necessary this spring, due to the unusually dry conditions of last year, the destructive hail storms that swept through Central Alberta last summer and to some extent to the unusually early frost last fall.

Live stock is generally in fair condition. There have been somewhat heavy losses of sheep and cattle due to the prolonged winter and late spring. Reports indicate that the lamb crop this spring will be lighter than usual.

Cattle shipments to the American markets have been continuing from Alberta, at good prices. The province's cattle industry has benefited considerably from the development of this trade, which has raised beef cattle prices to a level not experienced for some years. Since February 1st Alberta has shipped a total of 11,000 head to the United States markets, which is 18 per cent of the total Canadian shipments to that market.

There has been a marked decrease this far this season in butterfat in livestock to creameries, due to the shortage of feed crops last season in certain districts, and to the fact that fewer cows are being milked generally throughout the province.

## ST. ANDREWS ANGLICAN CHURCH

Sunday School will be held every Sunday morning as usual. Each last Sunday of the month will be allotted more particularly to a Young People's Service, starting next Sunday at the usual hour 7:30 p.m. You are invited to worship with us.

Charles P. Bishop, Student in Charge.

## OBITUARY HENRY LITKE

One by one the old timers of the district pass on. The latest being Henry Litke, aged 85 years. Mr. Litke was taken the hospital at Everdale Home several weeks ago while ill, but owing to his advanced age was unable to recover his normal health. The funeral service was held on Saturday afternoon in the Anglican Church with Rev. Inesmann of the Lethbridge Church officiating, by special request of the deceased. Mr. Litke was born in Germany in 1850, and with his parents soon emigrated to Russia. In 1883 he came to Canada and settled in Chalk River, Ontario, and in the summer of 1910 he moved to Gleichen, where he has resided since that time. There survive him his wife who is living in Chalk River.

## RESULTS OF THE PRIMARY ROOM EXAMINATIONS

**GRADE I**  
Norma Halstead, Laurel Wall, William Service, Robert Service, Dorothy Johnston, Wesley Clark, Frank McKay, Grace Sutherland, John Thompson and Neal Warner, William Johnston, Jean Miller.

**GRADE II**  
Billy McIntyre, Kenneth Matheson, Theresa Fleury, and Florence Bell, George Goodrich, and Stanley Warner, Edward James, Annie Brown, Ronald Gilbert, Alvin Sutherland, Colleen Warner, Eugene Plante, Grace Guthrie.

**GRADE III**  
John Boyd, Eileen Collins, Donald Reid, John Rodominski, Doris Krause, Maureen Pineau, Thomas James, Peggy Bogstie, Hazel Crum, Maurice Rishaug, Seldon Johnston, Eli Sherstobloff. Not classed George Vandell.

Teacher during April, Mrs. James. B. C.; five sons, Harry and Julius in Gleichen, Sam at Hyth, B.C. Louis in Carman, Man., and Fred at Bashaw, Alta. His two daughters are Mrs. A. Bates of Vancouver and Mrs. Emma Tait of Calgary. In all he has 21 grand children.

## MRS. JOAN PETERS

After a lengthy illness Mrs. Joan Peters of Cluny passed away. The funeral services, which were held in the United Church Gleichen were very largely attended. Rev. V. M. Gilbert officiating, after which interment took place in the Gleichen cemetery. Mrs. Peters was the wife of Andrew Peters and at the time of her death was 49 years of age. She was born in Dundee, Scotland and came to Canada in 1920 and has resided at Cluny since then. She was interested in the work of the United Church and Sunday school up till the time of her illness. Surviving are her husband; two daughters, Mrs. W. M. Frowse, Cluny, Miss Nora Peters at home; two grand children also her mother, three sisters and one brother, all in Scotland.

Among the floral offerings the following were noted: The Family; Mr. and Mrs. Graham and family; Mr. and Mrs. Jones and family; Mr. and Mrs. Nowicki and family; Mr. and Mrs. E. Riley and family; Mr. and Mrs. D. Clark and family; Mr. and Mrs. A. Oiler; Mr. and Mrs. W. Oiler; Mr. and Mrs. J. Oiler; Mr. D. Oiler; Messrs. Black and Murray, Cluny United Church W. A. and Sunday school, Nursing Staff Blackfoot Hospital; Mr. and Mrs. Black; Mr. and Mrs. Callison; Mr. and Mrs. R. Prowse; Mr. and Mrs. Amen and Elsie Gleichen, Masonic Lodge; Church Women's Institute; G. Sniderman, J. Haymond; C. Herman; Dave Nelson; W. Somerville; W. Forsythe; W. Creighton; C. Schafer; E. Thompson; S. Keir; G. Blair; A. Smith; F. Simard; S. Sampson; F. Fairbairn; A. Vastier; C. Quong; A. Wertz; L. Hong; Joe Berger; E. McIntosh; J. Werthmiller; Mrs. E. Kile; W. Robinson; R. Callison; J. Callison.

## MENACE OF THE HOUSE FLY

Different times, different manners! In medieval days when the black death, typhus, smallpox, and other violent plagues were taken as a matter of course, the phrase "he would not kill a fly" was invented as a very high compliment to personal goodness. Today, the person who would not kill a fly is looked on merely as ignorant. The house fly is world-wide in distribution and is notorious for the part it plays in the dissemination of such dangerous diseases as typhoid, infantile diarrhoea, tuberculosis, cholera, dysentery, and others. It breeds in filth of the most objectionable kind, and yet it is found in many homes and public eating places. The fly is a menace to public health owing to its habit of passing directly from its body to human food, carrying with it bacteria and other organisms and particles of decomposing organic matter. Its body, hairy legs, sticky feet, and mouth-parts. Undesirable organisms may also be conveyed to food in its excreta and regurgitated saliva (fly specks).

Several generations of house flies develop during the warm months of the year, says the Dominion Entomologist, the number varying with

The character of the season. The flies are most numerous in summer and early autumn but diminish rapidly with the advent of cold weather. The most effective and desirable method of controlling house flies undoubtedly consists in eliminating or reducing their breeding places to a minimum by properly treating or disposing of such materials as manure and garbage. Fresh horse manure is a prolific source of house fly production and this material is probably responsible for the majority of flies in rural sections. In cities, where horses have been largely replaced in favor of mechanical transport, garbage is an important factor in fly production. To be effective, control measures directed against their breeding places should be organized on a community basis, supported by a public well informed on the means of the house fly to health and the means by which it may be combated. One neglected or garbage dump is often sufficient to infect a whole neighborhood, and it is necessary therefore to enlist the active co-operation of the whole community.  
The beautiful trees are turning a beautiful green, the beautiful flowers are beginning to blossom with beautiful blooms, the birds are singing beautiful songs, and beautiful maidens are stepping out in beautiful dresses under the beautiful skies here in Gleichen. All of which leads one to assume that all the world is beautiful; but it isn't. It is as cold as blazes up north and hot as blazes down in the Southern States.

### Planning

In these days much is heard of the art of planning and the dire necessity for scientific, constructive planning in finance, economics, industry, social services, in fact in all the organization of our modern life and its varied interests and activities. Indeed, if a person was prepared to unthinkingly accept the advice being so freely tendered in many quarters, only one condition would be reached, namely, that mankind in mass would, if it would, definitely plan and order its way of life, and clearly and authoritatively scale and draw a plan that would work with the simplicity and accuracy of the multiplication table.

But life is not like that; too many contrary factors enter into the scheme of things and life, too many factors, influences and natural laws which are beyond human control to permit of any such artificial planning that will prove workable and fool proof. As the poet Burns so well expressed it:

The best laid schemes o' mice an' men  
Gang aft a-gley,  
An' lea'e us taught but, grief and pain,  
For promised joy.

Two years ago President Roosevelt's "brain trust" decided that the whole economic life of the United States could be planned and charted in advance; that it could scientifically plan and control the production of that great country so as to overcome and prevent what was alleged to be the evils of over-production. It set out to do so, but instead of facing the primary cause of the alleged over-production, it adopted and acted upon the easy formula that all that was necessary was to compel by law a reduction in the volume of production.

So wheat farmers were bonused, not to grow wheat, but to stop growing it; cotton planters were bonused to stop growing cotton; farmers were paid to quit raising hogs and so forth, and the consuming masses of the people were taxed in order to raise the funds wherewith to pay these bonuses on destruction. Then Nature stepped in, withheld its usual bountiful supply of rain, sent excessive heat and blistering winds and swirling dust storms, and in a brief space of time reduced production over man's mistaken efforts, and to a far greater extent, until within a few months a shortage of supplies faced the nation instead of an over-production, which over-production had actually resulted from a previous form of artificial planning in the shape of tariffs and other trade restrictions.

Following the Great War, the statesmen of the world assembled in Paris to draft a treaty of peace and to plan the future of Europe and the world. They labored for months, created elaborate international machinery to direct and control world affairs, re-arranged the boundaries of countries, and gave birth to new nations. On paper their plans looked good; they were hailed as a great advance in the cause of world peace and international goodwill and co-operation.

But in the years that have followed all the passions, prejudices, suspicions, racial and religious animosities, and vagaries of human nature have continued to hold sway over millions of mankind. Much of the planning has proved an abject failure, some of it has been thrown into the discard, and what remains is in danger of destruction through another world upheaval. Thus has it been amply demonstrated that man cannot direct and control the immutable laws of Nature, nor can he forecast them in any scheme of planned economy he may devise; neither can a few planners, however able and sincere they may be, draft plans and charts which will work despite all the selfishness, the ambitions, the ignorances, passions and prejudices of man.

This being so, the nations are now being told by the planners that mankind in the mass can no longer be trusted; that democratic forms of government are a failure; that instead of the people creating and controlling their governments, forms of government must be set up which, controlled and directed by a few, will super-impose their will upon the masses, control and order the people, instead of the people controlling the governing bodies.

Such a plan may be inaugurated; it may work for a time, but not for long. It can never possess any degree of permanence, because man was created a free being with a mind, a will, a soul of his own, and in the final analysis he will, because God and his own nature intended that he must, work out his own salvation. No other power, and least of all a government, can do it for him.

Nevertheless, there must be planning and there must be control and direction. Everything cannot be left haphazard, otherwise chaos and disorder would ensue. But it must be recognized that there are limitations in all planning, and those imposed by Nature's laws and by human frailties cannot safely be ignored. Nor can the inborn desire and determination of every man to be a free man and enjoy liberty be denied; any attempt to do so will breed revolt. It always has, it always will. But liberty does not mean license, and in demanding liberty for himself each man must recognize the rights of others and accord liberty to others.

Therefore, in all our planning the improvement and advancement of the individual must precede improvement of and advancement in any system that may prevail. It is putting the cart before the horse to try and improve the system first and thereby improve man; it must be the other way round. God does not remove all evil and temptation in the world, but we are taught to pray that we be not led into temptation.

The proper study of mankind is man, and the proper, only permanent, planning is by individual man, namely, that he so order his life and his activities, so control his ambitions and his passions, as to come within the plan laid down in the Golden Rule—Do unto others as ye would that they should do unto you.

### Helps Building Industry

**Chemistry Comes To Aid With Many New Materials**

Even eggs and milk may enter the making of new construction materials in a building boom predicted by famous chemists at the opening session of the American Chemical Society's tercentenary celebration in New York.

A boom in the building industry inspired by discoveries of chemists, many of them made during the depression, was forecast by Prof. James R. Withrow of Ohio State University.

Artificial stones are already made in every color and with any degree of hardness a customer desires. Wood rot and metal rust are both stopped by numerous new protectives.

Bricks that partake of the lightness of childhood and other light weight construction materials promise much higher, yet even safer skyscrapers.

### Queen Mary's Tea Chest

**Gift From Ceylon To Be Exhibited In Toronto**

Visitors to the Ceylon exhibit at the forthcoming Canadian National Exhibition in Toronto will have an opportunity to see the beautiful chest presented to Her Majesty at Christmas by the Empire Tea Growers. The chest is made of rare and lovely woods—rosewood from India, inlaid with satinwood and ebony from Ceylon and purchased from British Guiana, the woods being left in their natural state at the express wish of Her Majesty. The inlay on the lid has the Queen's own royal cypher. When presented to Queen Mary the chest contained fifteen pounds of the finest grown Ceylon tea, valued at over \$5 per pound.

## NOT A RHEUMATIC PAIN FOR 4 YEARS

**70-Year-Old Man Praises Kruschen**

A man who once suffered severely from rheumatism writes: "For a long time I suffered with rheumatism, and at one time was laid up for about nine weeks. About five years ago I was advised to try Kruschen. I did so, and have continued using them ever since. Kruschen did the trick, as I have not had a rheumatic pain for over four years. I am nearly 70 years of age, and feeling fine, and always able for my day's work—thanks to Kruschen."—A. S.

Kruschen dissolves away those needle-pointed crystals of uric acid which are the cause of all rheumatic troubles. It will also flush these dissolved crystals clean out of the system. Then if you keep up "the little daily dose," excess uric acid will never form again.

### Of Canadian Make

**Dominion Supplies Medium-Quality Gauntlets For English Motorists**

Motorist and motor cyclists in the United Kingdom wear leather gauntlets when driving during the winter. Even during the summer months motor cyclists use them when traveling at night. A large proportion of the medium-quality motor cyclists' gauntlets are of Canadian make, according to the Industrial Department of the Canadian National Railways. While the British are experts when it comes to sheepskin gloves, strange as it may seem, in the case of those made of heavier leathers, such as cow, mule and horse hide, they have to be imported.

### A Dangerous Procedure

**Doctor Warns Against Forced Giving Of Cod Liver Oil**

Dr. Irving Graef, pathologist of Bellevue Hospital, New York, told the American Association of Pathologists and Bacteriologists, mineral oils and animal fats drawn into the lungs of infants and adults had proved fatal in six cases of pneumonia. Cod liver oil, described as good when taken into the stomach for bone building, Dr. Graef said was deadly when it entered the lungs. He cited one case to show the oil had entered the lungs through forcing a reluctant child to swallow it by holding his nose.

### Umbrella Works Idea

Because one cannot carry an umbrella when wearing a uniform and maintain one's dignity, the rain shields have gone out of style in Germany. As a result 150,000 people in the umbrella industry have been thrown out of work and manufacturers are seeking ways and means to bring the umbrella into its own again.

### Another Surgical Find

**Human Suffering Reduced By Operation On Pain Nerves**

Surgery on the nerves of pain offers hope of reducing human suffering.

The operations possible were reviewed by Francis C. Grant, M.D., of Philadelphia, at the meeting of the American College of Physicians.

Some of the fibres form the bundles of nerves, just as separate fibres form threads, carrying the sensation of pain; others give the movement orders.

By cutting the pain fibres in the spinal cord pain can be stopped in the legs and up into the pelvis. Touch and position nerve fibres remain unimpaired and the movements of the legs are not interfered with.

Another operation severs the roots of some of the nerves, but is seldom used because, while it relieves pain, it interferes with movement.

Seeking to block the "pain pathways" through the nervous system is the latest method of attack. This has been done successfully for some pelvic malignancies and for angina pectoris.

### Powerful Searchlight

**Throws Beams Which Will Illuminate Objects Within Fifty Miles**

Residents of Pittsburgh city gazed in wonderment at a powerful shaft of light that penetrated the darkness for many miles. It originated from what engineers say is probably the world's most powerful mobile searchlight undergoing a test prior to its delivery to the United States army.

The searchlight is a 60-inch giant and throws a beam of 760,000 candle power. Engineers who built it say the light's concentrated, narrow beam will illuminate any object within 50 miles. The "detecting" equipment is entirely mobile, carried aboard trucks.

An aeroplane with a 100-foot wing spread flying 200 feet high and six miles away appears to the human eye about as big as a wasp.

To find an enemy bombing plane under such conditions—and travelling at 250 miles an hour—would be quite difficult. The searchlight is designed to do it, and expose the plane to the fire of anti-aircraft artillery.

### Upholding The British

**New York Paper Sticks To Statement About War Debts**

"The New York Daily News says: 'We've received a number of unfattering letters in reply to our editorial in which we said England is right in refusing to pay any more of its war debts to us for the time being. These letters advise us that we are in the pay of the Redcoats, traitors to Uncle Sam, trying to lick the King's boots, etc.'

Let's come down to brass tacks. How about our debts to our own people (and to any foreigners who happened to buy our bonds)? We aren't paying them, are we? President Roosevelt has taken 40 cents out of every dollar, and he won't pay a dollar of those debts in gold. Furthermore, our Supreme Court sustained that default. So if John Bull is a nasty old repudiator, what is Uncle Sam?

The fact is the war cost so much that every country which took part in it, including ourselves, has had to repudiate a large part of its war debts."

### Came! For Russian Farms

Farmers of Soviet Russia are to be supplied 257 cattle this year to be used in the establishment of new camel farms. The farm in the semiarid Yedich district of Western Kazakhstan now has 2,335 ships of the desert, the herd increasing 24 per cent. in 1934.

**20¢**

**DIXIE**  
**PLUG SMOKING TOBACCO**

### How Spare Pennies Grow

**British Post Office Savings Increased By \$28,000,000 Last Year**

More pennies and shillings than ever are being put into Post Office Savings Banks in Britain.

The head office has announced that deposits of small savers have reached the record figure of \$385,000,000. They increased by \$28,000,000 during last year alone. Over the last two years they have increased by \$50,000,000.

These large sums are made up entirely of the occasional spare coins of villagers and townsmen in Britain. One of the methods of saving is to buy special stamps and stick them in a savings book. When a certain number have been collected the book is given in to the local post office and the amount represented is credited to the saver's account.

Last year \$50,000 "home safes" were issued. These are special post office home money boxes which can be taken to the local post office when the owner desires and the amount in them credited to his account.

The Post Office Savings Bank now has more than 9,500,000 depositors. And that number is increasing by 12 per cent. each year.

### Are Becoming Important

**Aviation Is Creating Interest In Islands Of Ocean**

Soon every little island in the ocean is going to find itself important and it is certain that, with aviation developing as it is, places which in the past have not even been spots on the map will become centres of interest. Here, for instance, is the case of the Wake Islands, away out in the Pacific Ocean. There are three small islets, with a total area of not more than 2,600 acres, yet they are to be a point of call on the proposed U.S.-China air route, plans for which are now well under way with Pan-American Airways and the United States Government co-operating.

If on rising in the morning you stand in your pyjamas before the open window and slip your chest with both hands for several minutes you will notice a crowd slowly gathering in the street below.

Clubs for railroad workers are being organized in Russia.

### Bible Distribution

**Colporteurs Deliver An Average Of 30,000 Bibles A Month**

By dog team in the far north and on foot through every part of Canada, Colporteurs distribute an average of 30,000 Bibles a month, according to the annual report of the Canadian branch of the British and Foreign Bible Society.

An increased demand for Bibles in English is reported from foreign language groups of workers in Western Canada. After all expenses were met, \$39,000 was sent to London for worldwide work compared with \$23,000 in 1933. Bibles distributed showed an increase of 22,000.

## FOR FAST RELIEF FROM PAIN

All Druggists Have It

Get tin of 12 tablets or economical bottle of 240 for at any druggist's.

DOES NOT HARM THE HEART

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking hold" . . . cases even a bad headache, neuritis or rheumatic pain almost instantly. And it keeps on relieving. Doctors prescribe it. For Aspirin does not harm the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all druggists have it.

**Demand and Get ASPIRIN**

## Campaign To Save Refugees

White Russian Orphans Neglected Says Dame Rachel Crowley

"The orphans of the world," White Russian refugees living in Manchuria, will not remain neglected longer if Dame Rachel Crowley, of London, has anything to say about it.

"Something must be done about these people, and I'm going to do it," she declared at Montreal after describing conditions found on her recent visit to Manchuria. "They have been neglected, forgotten, allowed to starve. I have political aspirations, but I am going to surrender them until I see that the world helps these White Russians. I am going to sit up the League of Nations. I promise you."

Dame Rachel told of ragged, hollow-eyed urchins smoking heroin cigarettes in the streets of Harbin to kill the pangs of hunger and huddling, homeless, at street corners with the thermometer at 72 degrees below zero. In the morning, she said, Chinese coolies gathered up the little frozen bodies.

The girls, Dame Rachel said, had a grim choice to make. They could either become prostitutes and dancers in the "dives" on the banks of the Tsungari or else become the concubines of Chinese.

Dame Rachel, who was war-time commandant of British volunteer nurses in France, visited Manchuria to study the relations of the Chinese and Japanese. She was chief of the League of Nations social questions and opium traffic section from 1919 to 1921 and has been appointed as the only woman member of the independent commission which is to investigate the manufacture and sale of armaments in Britain.

### Did Not Trust Mission

A colored man went to a clergyman and handed him a letter to the Lord, asking him to "please send" his poor ducky \$25 right away.

The clergyman, a kind-hearted man, felt sorry for the colored man, and calling together several of his friends, he said:

"This poor fellow has so much faith in the Lord that he expects Him to send him \$25 right away. We shouldn't let him be disappointed. Let's make a collection for him."

The next day the colored man received a letter containing \$15. He went immediately to the clergyman and wrote another letter, which ran like this:

"Dear Lord—De next time you send dis ducky money, don't send it through no parson—send it to me direct."

## WEAK WOMEN

ARE you tired, nervous, run-down? No pep? No ambition? Wake Lydia E. Pinkham's Vegetable Compound. It's a reliable remedy for all the ills of women.

Life seem worth living again. Mrs. James Martin of 227½ Main Street E., Hamilton, Ontario, says: "My Vegetable Compound built me up wonderfully. I have gained pep, my nerves are better and I have a good appetite. I feel much stronger."

Try Lydia E. Pinkham's Vegetable Compound.

## Has Sound Common Sense

Stanley Baldwin Stands For Best Traditions of Public Service

Rt. Hon. Stanley Baldwin may not be a great statesman, he may not have a flair for publicity or catch who so thoroughly believes in British in British public life who has sound common sense, who stands more for the best traditions of public service, who so thoroughly believes in British ideals of freedom and liberty or speaks with more authority for old-fashioned John Bull as Mr. Baldwin.

Recently, as reported in British papers at hand, he spoke to the Junior Imperial League in London. He pointed out that to-day England was "the torch-bearer of ordered freedom." He urged the youth of England not to be carried away by wild theories, but to guard this freedom "against all assaults open and subterranean."

Mr. Baldwin had to admit that the dream of disarmament is not going to be effected in the near future. However, he did not denounce the poor old League of Nations, but rather pleaded for support for the League. It needs friends as never before. He went on to say:

"I am not going to turn round and blame any particular country and least of all the League of Nations. The League of Nations needs its friends to-day, and I hope that all those who, like the government, have worked with it and for it, will stick with it to-day as they have never done before."

There was no doubt in his mind that many of the League's advocates pitched their stories too high as to what the League could do in the early days. They must not expect that in ten years the nations of the world would turn over a new leaf and turn it over for good and for ever.

The plea of Mr. Baldwin is one that should be remembered in this country. British institutions are being challenged to-day as never before. After all they are built on liberty and freedom. Wipe them out and everything that we hold dear will go with it. Let us stand by our institutions and likewise by the League of Nations, the only organization in the world which stands for world peace. If the League disappears, it will be a return to the jungle—London Free Press.

## The Zoo Hospital

Is Considered More Interesting Than Any Other Place

When at the zoo, don't forget to visit the sick animals, or you will miss the most interesting place. The hospital is the most amusing yet pathetic part of a zoo, a U.S. National Geographic Society bulletin said.

"From cages and crates of every size peer individuals," the bulletin said. "In one a deer with a bandaged foot. In another, a sad-faced monkey wears a wooden collar to keep it from tearing the plaster cast from its broken arm. A giraffe with a sore throat looks down on them, its long neck weak in hangings."

The zoo doctor must be versatile. He has to "raw off the teeth of overly pugnacious alligators," the Society said, treat the bee-bugs for mumps and the elephants for stomachaches.

Elephants, the bulletin explained, upon first being brought from the tropics to more temperate regions, often suffer stomachaches and roll on the ground in pain. The usual remedy is a blanket-stuffed mustard poultice and a stiff dose of gin and ginger.

"Elephants become so pleased with the tonic that they often stage an illness merely to be dosed."

Captive animals, although given the best food and surroundings, suffer from one or more ailments as a patent medicine pamphlet, the bulletin said, "and if it were not for the careful attention of the zoo doctor, zoos would soon be full of empty cages."

### To Save Argument

Fastening of movable objects aboard ship has been extended, in the case of the S.S. Cairnross, to chess men. Two officers, playing while the Cairnross was in port, used a board with a little hole in the centre of each black and white square. Nails at the bottom of each chess piece fitted into the holes. "Just an idea to save an argument in case of a heavy swell upsetting the board," said one officer.

Pupil (after lesson on creation): "But, teacher, daddy says we are descended from monkeys."

Teacher: "We can discuss your private family affairs in class."

It was not unusual for a person to drink 40 to 50 cups of tea daily during the seventeenth century. 2068

## 1000 PAIRS OF MONARCH DEBUTANTE SILK STOCKINGS Free!

Go to your druggist or department store and buy RIT Dye (any color, 15c-2 for 25c). Use it. Then tell us in a statement of 50 words or less, why you prefer RIT—1,000 pairs of Monarch Debutante silk stockings—show-free pure silk chifon stockings—latest Spring shades—guaranteed \$1.00 value will be given as prizes to 1,000 entrants. There are dozens of reasons why you will prefer RIT. RIT comes in 33 basic brilliant colors, from which can be produced over 500 of the newest Paris shades.

**FAST COLORS WITHOUT BOILING!** Only RIT offers this advantage! RIT is the modern tint or dye—color and color—superior to ordinary "surface dyes" because it contains a patented ingredient that makes the color fast to dyes, set faster and last longer. Sold everywhere.

**HOW TO WIN** 1. Write a short statement (under 50 words) on why you prefer RIT Dyes and send it together with an empty RIT package (or reasonable facsimile) and your name and address, to John A. Huston Co., Ltd., 42 Calverton Rd., Toronto. 2. Send as many as you wish; contest closes midnight June 29, 1935. 3. 1,000 prizes will be awarded on the decision of the judges, which will be final. Whether you win a pair of silk stockings or not, we will mail to all entrants free of charge, our famous booklet—"The A.B.C. of Home Rag Making."

NOT A SOAP!

TINTS AND DYES

Coloring for all kinds of fabrics to measure for the package.

A Strange Coronation

Pictureesque Ceremonies To Mark Crowning Of Island Sultan

The 2,000 little Maldivian islands set in the Indian ocean will be the scene of one of the strangest coronations within the next few weeks.

The people's council has selected Prince Agamang Manikulu to succeed the ex-Sultan Shamsu-Din Iskandar Muhammad. The new sultan is a nephew of the ex-sultan, and is 50 years old.

Prince Manikulu is a tall and formidable figure, but he hopes to be able to wear his uncle's 147 suits, cut in European style, which, with an army of 1,000 elephants, are the ex-sultan's legacy to his successor.

The Maldivian islands are managed as a British protectorate. They are governed by native constitution and the ancient rites of the males. The ruler is selected by the people's council, but is not confirmed and crowned without the sanction of the people, which is given in a special assembly.

As soon as the confirmation is sealed a donkey is brought into the arena and is decked with garlands. An imphish boy of seven is chosen to ride the animal. He is seated with his face to the tail, naked, with a bunch of seaweed on his head.

The boy's job is to carry the glad news of the coronation to the various islands. As most of them are barren and uninhabited, the tour does not take more than a week.

When the donkey returns to Male he is received by the new sultan with respect and pomp. He is garlanded with a string of cowries, a coral formation, which is the currency of the islands. One thousand cowries make a penny.

American automobile tires are becoming popular in Turkey.

What's wrong with this Mustard, Mary? It's very poor stuff! Why John—

I thought I was getting a bargain—a big bag for 10c

"It's no bargain at any price! I'll bet you would get more mustard in 10c worth of Keen's than you would out of any 10c substitute. The extra bulk is only four, ground up hills and colouring matter!"

"You're right! From this time on I'm going to stick to Keen's."

**KEEN'S D.S.F. MUSTARD**

Made from seed grown especially in the West of England. The shells or hulls are removed, the white being the inner part of seed. A superior quality makes the full flavor readily available. In original tin for as little as 10c.

Keen-Keen (Canada) Limited 1000 Avenue Street, Montreal, Que.

## Studying Ocean Airways

Ambitious Travel Schemes Are Now Being Worked Out

Air travel pioneers of various nationalities are working out plans to straddle the world with airship services running to a regular schedule. American and German interests are in the forefront of the negotiations.

Already plans to run German and American airship lines across the North Atlantic have been announced. The South Atlantic is already spanned.

Now the Pacific, the Far East, Europe, North and South America, Canada, and probably other Dominions are to be linked.

South Africa will be joined to Germany by zeppelin.

A giant new ship is nearing completion in the airship docks at Friedrichshaven, Germany.

When it is ready it will make a few trial trips across the North Atlantic. Then it will be replaced by other ships and will run on the South American service.

American plans include a Pacific service and a trans-Atlantic service. A base will be made in Britain either at Cardington's R.A.F. station or at Southampton.

Southampton's plans, as yet incomplete, include a floating airship dock, but this will only be built if a regular port of call is made there.

No Mistakes Made

Pupil Learned To Fly Sooner Than He Expected

A two-seat open aeroplane, flying over one of London's main air clubs, carried a pupil and his instructor.

They had been in the air for half an hour. It was the pupil's third lesson. He had correctly performed all the manoeuvres the instructor had ordered through the telephone.

"We will now try a landing," said the instructor. Obeyingly the pupil banked the aeroplane and dived. Soon they were only a few feet above the grass of the airfield, and the pupil, confident that the instructor held control in his own cockpit, carefully went through the motions of landing the aeroplane.

The undercarriage touched the ground. The pupil was making a perfect landing, but thought the instructor was aiding him by subtle touches on the dual controls in his own cockpit.

Slowly the aeroplane came to rest. They climbed out. "Good thing you made such a perfect landing," said the instructor. The pupil blushed with pride. "But," he said, "you corrected the inevitable mistakes from your controls?"

The instructor showed the pupil the controls in the instruction cockpit.

They had broken down!

The Death Ray

Paris Radiologist Scoffs At Idea It Can Be Used In Warfare

The inventor of the "death ray" scoffs at any idea it could be used effectively in actual warfare.

Dr. Jacques Bretton, University of Paris radiologist, arriving in New York, said he recently had killed a mouse at 30 feet with a ray composed of short electric waves and ultra-violet radiations, but it cost him \$2,000.

Increasing the volume of the ray—at enormous cost—would not necessarily increase its lethal effect to kill a human being, Dr. Bretton said.

**THE RHYMING OPTIMIST**

By Aline Michaelis

DEFINITIONS OF LOVE

Love is the brook flowing,  
Love is the wind blowing,  
Love is a ship going  
To sea!  
Love is a word spoken,  
Love is a bright token,  
Love is a heart broken  
Maybe  
Love is a vine clinging,  
Love is a youth singing,  
Love is a bird winging  
Forth free,  
Love is a soul yearning,  
Love is a fire burning,  
Love is the Earth turning,  
To me!

Spain Makes Beggars Work

Spain is to establish a chain of camps for beggars, who will be housed in straw and fed but made to work, converting marshy land into arable soil. The first camp will be opened near Madrid. It will have capacity of 1,500 persons.

## Elevators In Vienna

Take Passengers Up But You Have To Walk Down

Like a one-way street in Chicago are the elevators in Vienna, Austria. They go up—but as far as traffic is concerned they never come down again. It is impossible and certainly not according to the rules of the game ever to expect to come down in one of them. That would be asking and expecting too much.

Furthermore, you don't stand much chance anyway, for in most apartment buildings that boast "lifts" or elevators there is no manner or means of bringing the elevator to your floor. Once you step out of it on whatever floor you happen to stop, it quietly and daskly slides out of your hand and so back to the ground floor.

But you wish to go above the third floor, then press a button for the porter or concierge. Some antiquarian sort of woman pops out almost seemingly from nowhere. With a private key she opens the door into the elevator. As you step in you hand her the necessary tip. This is most essential.

You now find yourself in a small coop-like affair about the size of a coffin. You glide silently up or down. The box stops and you swiftly, if you know your business, open a door. Hardly have you closed it again before the pendant affair has dropped out of sight. To get down to the street level again, well, there are the stairs.

In one of the best hotels in Vienna, and one most frequented by American tourists, are five elevators. Four of them are operated by electricity. None of the four is in operation. Electricity costs too much and so they have been discarded. To go upstairs you take the hand-propelled elevator. You step in, either tipping now or at the end of your stay in the hotel, and the attendant follows you in, closing the door behind you. He seizes a hempen rope and with graceful, effortless motions brings you to your destination.

When you desire to return to street level, do you press the button? You do not. You walk down the four or five or six flights of stairs.

Birds Are Good Calendar

Beach California Mission On St. Joseph's Day As Usual

Swallows kept their 68th "date" with historic old San Juan Capistrano mission in California. Promptly on St. Joseph's day they arrived, drove off the "swiftns," another feathery tribe, and prepared to remain until San Juan's day, Oct. 23, when they'll depart for climates even warmer than that in southern California. The swallows have been doing it for 68 years, mission records reveal.

A Remarkable Race

The most remarkable horse-race ever run in England occurred at the Royal Fench Handicap at Windsor in 1923, when three horses, Dinkie, Marvel and Dumas, dead-heated for first place. Scrutiny of a photograph snapped at the finish failed to show a fraction of an inch separating the nose-tips of the three runners.

Many Accept Offer

Last Easter Monday brought marriage and money to 4,412 young Roman men and women. The Fiscalist party had offered \$50 lire—about \$42 to all in Rome or its province who would make it their wedding day, and officials announced that 2,296 couples took the party up on its offer.

After a two-hour struggle a shark 27½ feet long and weighing five tons was caught recently in a fisherman's net in Hout Bay, South Africa.

It has been found that a woman's system is less able to burn body fats than a man's. For this reason, a starving woman suffers more than a starving man.

## Town & District

The Imperial Veterans Branch of the Canadian Legion, B.E.S.L., are holding a reunion at Sylvan Lake on June 1 and 2.

Floyd Sammons has been appointed poundkeeper at S.W. 23-23-22. W. Sanders will be poundkeeper at 10-23-23. They will commence their duties next Monday May 27th.

Most of the gardeners in town have finished their seeding and are now anticipating the big feeds they hope to get in the near future.

Arrowwood has planned a day of sports for June 3rd. All kinds of athletic sports will be staged. There will also be a baseball tournament between Quenston, Blackie, Lomond and Arrowwood.

Mr. A. Peters and family wish to thank the many friends who assisted them in any way during their recent and bereavement.

Old age pensions were paid to a total of 6879 persons in Alberta during 1934.

Mrs. Hugh James was the guest of honor at a shower held recently at the home of Mrs. Wm. McConnell. Physically all the ladies of the town were invited and a large number who could not be present sent in their good wishes and presents. Mesdames Lumsden, R. W. Brown, R. Haskayne and P. Downey assisted Mrs. McConnell in arranging for the entertainment. A contest was part of the program at which a great number of Alberta town names represented the answer to questions. Mrs. T. H. Beach and Mrs. H. James tied as winners of the contest. Mrs. James being awarded the prize on drawing for it. After refreshments had been served the Misses Jean McConnell and Marie Lumsden brought in tulips, baskets and arms full of gifts for the bride. The entire event was a splendid success.

A. R. Yates had his residence painted last week. At this writing the residences of W. E. Thompson and W. Evans are being painted by Johnson & Flury. Several more residences are due to be painted. If this work was kept up for a while how much better the town would look.

Summer has arrived. Sunday a number of town boys went in swimming in the backwaters of the Bow River. The young lads say it was cold at first but once wet it could not be beat.

For the first time in its history, Alberta took the lead among provinces this spring in the matter of total hog marketings. For the first 18 weeks of the year the marketings for Alberta totalled 342,565 head compared with Ontario's 298,954 head. There was also a further marked improvement in the quality of Alberta hogs, the total percentage of selects and basons marketed during the above period having been 55.58, passing the 50 percent mark for the first time, as compared with 46.16 per cent for the same period in 1934 and 40.50 percent for 1933.

A head-on collision took place on the main highway just north of Gleichen when A. Moseholm of Redcliff driving his Pontiac coupe met with F. Burling of Gleichen. Mrs. Burling was thrown through the windshield of the Ford coupe and was badly cut and bruised about the head and wrist. No one else was injured. Both cars were considerably damaged and landed in the same ditch on the side on which Mr. Burling was driving. The Ford driven by Mr. Burling was almost at a standstill when struck, or the accident might have been more serious. The accident occurred Friday night Mr. Moseholm was able to leave his car repaired and to proceed to Redcliff on Saturday night. Mr. and Mrs. Burling had also contemplated leaving the next morning on a motor trip but owing to the condition of Mrs. Burling and the car postponed the trip. Dr. Farquharson was called to attend Mrs. Burling.

Over the period May 15-24 inclusive, the Canadian railways are offering special bargain fares figuring approximately at one cent a mile from various eastern cities to western Canada. Return limit is thirty days from the date of issue of ticket with stopovers within the limit of the ticket at Port Arthur, Armstrong and points west thereof.

Addressing an audience of more than a thousand representative business men at Toronto recently, E. W. Beatty, K.C., LL.D., chairman and president of the Canadian Pacific Railway, stated that the Canadian National Railway system was never an honest experiment in public ownership and that it was neither more nor less than a sad accident. This problem, he said, constitutes Canada's most difficult problem and threatens national solvency.

It is not necessary to go to a midway to enjoy a ride. Prove this to your own satisfaction by taking your car over the newly graded road west of Strathmore. This ride is especially joyful after a heavy down pour of rain and should be called the "Royal Bumps."
